Austin Hardware Introduces Vending Machines for VMI Customers - Early Adopters

Recognizing 25% Consumption Decrease on MRO Items

Austin Hardware has made available MRO product dispensing vending machines for qualifying Vendor Managed Inventory customers. *Early adopters are already realizing a 25% consumption decrease on MRO items.*

The vending machines work just like a typical candy or soda vending machine, but instead they dispense various MRO type items such as gloves, safety goggles, and drill bits. The concept allows the customer to generate reports to track frequently used but difficult to control items. This allows the customer to better track inventory and costs of the selected items.

Each machine is customizable at a minimal cost to accommodate a large variety of products and can be reconfigured within minutes to change the size of the slots and feeder coils. They can be set up to manage whatever the customer may need.

For more information contact Austin Hardware at 800.821.3520 or visit

www.austinhardware.com/contact.cfm for the number for your nearest Austin Hardware location.
